

## Low Noise Closed Type Cooling Tower Low Water Consumption For Induction Furnace

### Our Product Introduction

for more products please visit us on [melt-furnaces.com](http://melt-furnaces.com)

#### Basic Information

- Place of Origin: China
- Brand Name: Huarui
- Certification: patent; national testing report; quality management system
- Model Number: to be customized
- Minimum Order Quantity: 1 set
- Price: to be negotiated
- Packaging Details: waterproof
- Delivery Time: 30~45 days
- Payment Terms: T/T; L/C
- Supply Ability: 1000000 sets/ year

#### Product Specification

- Warranty: 12 Months
- Noise Level: Low
- Efficiency: High
- Maintenance: Low
- Water Consumption: Low
- Advantage: High Power Saving
- Durability: High
- Highlight: Low Noise Closed Type Cooling Tower, Furnace Closed Type Cooling Tower

## Product Description

### Product Description:

Water circulates in the coils of a closed cooling tower. The walls of the coils absorb the heat of the fluid, and then it is exhausted out by the fan on top of the tower.

When the temperature inside the coils goes above the predetermined amount, the spray system will automatically start. Water will be sprayed onto the hot and damp coils forming a water film. This film will absorb the heat from the coils and turn to vapor. The vapor will be carried away by the flowing air with the unevaporated water droplets falling into a collection tank for easy recycling.

The closed loop design uses minimal water consumption. Even the spray water is used in very small amounts.

### Features:

Nowadays, we are living in a society that is more conscious about protecting the environment.

It's important to choose the right cooling system to support these efforts. Compared with traditional cooling systems, this new and updated system has many advantages, which bring more convenience to people's life.

One of these advantages is its low water consumption. This will help reduce our water waste and minimize the burden on the natural resource. Along with that, this system can also provide high cooling efficiency. It requires small covering area and has a compact structure, which is space-saving.

Moreover, this cooling system is designed to prevent the scale deposit inside itself. This ensures the no environmental contamination in our ecosystem. As a result, the environment-friendly system can meet the needs for green solutions while providing people improved comfort and convenience.

In conclusion, this new and updated system makes a great contribution to protecting the environment by its low water consumption, high cooling efficiency, small covering area, compact structure, no scale deposit inside the cooling system, no environmental contamination etc.

Property	Value
Advantage	High Power Saving
Maintenance	Low
Efficiency	High
Water Consumption	Low
Durability	High
Warranty	12 Months
Noise Level	Low

### Applications:

The Huarui Closed Cooling Tower is an ideal choice for induction melting furnace, chiller for power supply cabinet, and melting system. It is highly efficient and features a low noise level, making it highly cost-effective. It also offers high power saving and low maintenance, saving customers time and money. This closed cooling tower comes with a 12-month warranty and patent certification, national testing report, and quality management system. The minimum order quantity is one set, and the price is negotiable. The packaging is waterproof to ensure the safety of the product. Delivery takes 30~45 days, and payment terms include T/T, L/C. Huarui has the capacity to provide 1,000,000 sets per year.

### Customization:

Closed Cooling Tower

Brand Name: Huarui

Model Number: to be customized

Place of Origin: China

Certification: patent; national testing report; quality management system

Minimum Order Quantity: 1 set

Price: to be negotiated

Packaging Details: waterproof

Delivery Time: 30~45 days

Payment Terms: T/T; L/C

Supply Ability: 1000000 sets/ year

Features

Noise Level: Low

Maintenance: Low

Durability: High  
Warranty: 12 Months  
Efficiency: High  
Applicable Scenarios  
Cooling Tower for Melting System  
Closed Cooling Tower for Induction Furnace  
Cooling Tower for Power Supply

## Support and Services:

### Closed Cooling Tower Technical Support and Service

Our Closed Cooling Tower is supported by a team of expert technicians who are available to provide technical assistance and service when needed. We have a wide range of services that can help you with installation, maintenance and repair of our Closed Cooling Tower. Installation Services – We can help you with the installation of the Closed Cooling Tower, from the initial inspection to the final testing.

Maintenance Services – We offer regular maintenance services to ensure the Closed Cooling Tower is running efficiently and safely.

Repair Services – We have a team of experienced technicians who can help you with any problems that arise with the Closed Cooling Tower.

Parts and Accessories – We can provide all the necessary parts and accessories to keep your Closed Cooling Tower in top condition.

If you need any assistance with the installation, maintenance or repair of your Closed Cooling Tower, please do not hesitate to contact us. Our team of experts will be happy to help you.
