

## Small Induction Metal Melting Furnace Low Maintenance Energy Saving

### Our Product Introduction

for more products please visit us on [melt-furnaces.com](http://melt-furnaces.com)

#### Basic Information

- Place of Origin: China
- Brand Name: Huarui
- Certification: patent; national testing report; quality management system
- Model Number: to be negotiated
- Minimum Order Quantity: 1 set
- Price: to be negotiated
- Packaging Details: water proof
- Delivery Time: 30~45 days
- Payment Terms: T/T; L/C
- Supply Ability: 1000000 sets/year

#### Product Specification

- Durability: High
- Power Saving: High
- Reliability: High
- Safety: Complete
- Melting Efficiency: High
- Maintenance: Low
- Highlight: **Electric Metal Melting Furnace,  
Metal Melting Furnace Energy Saving .,  
Electric Small Induction Melting Furnace**

## Product Description

### Product Description:

Metal Melting Furnace System is an induction melting furnace that is highly durable, reliable, and power-saving. It provides maximum melting efficiency and requires minimal maintenance. Its advanced induction melting technology is ideal for industrial applications that require high-quality metal melting furnace systems. The metal induction melting furnace is designed to ensure excellent melting performance with low energy consumption. It is capable of producing superior-quality metal products such as aluminum, bronze, copper, stainless steel and more. Its advanced control systems and monitoring systems are designed to ensure maximum safety and reliability. The metal melting induction melting furnace is the perfect choice for any industrial setting looking for superior melting efficiency and safety. With its reliable performance and low maintenance requirements, the Induction Furnace System is the ideal choice for any industry.

### Features:

Product Name: Induction Furnace System

Low Maintenance

High Power Saving

High Melting Efficiency

High Reliability

High Durability

Induction Melting Furnace

Electric Induction Furnace

### Technical Parameters:

Induction melting furnace power supply, thyristor type serial-connected resonance medium frequency type(0.5 tons), as for other data of other capacity (tons), please check other pages in our this website.

Characteristic	Description
Type	GW0.5-450-1.5S
Rated capacity (T)	0.5
Rated power (KW)	450
rated frequency (HZ)	1500
power supply (V)	380
inlet current (A)	734.4
medium frequency voltage (V)	2500
load type	One power supply cabinet drives two induction furnaces
adapted transformer (KVA)	500

### Applications:

Huarui Metal Melting Furnace System has different model that can be negotiated and it is certified with patent, national testing report and quality management system. It comes with a minimum order quantity of 1 set and its price can be negotiated. It is packaged with water proof to ensure its protection and delivery time of 30-45 days. Payment terms are available in T/T and L/C with a supply ability of 1000000 sets per year.

The Metal Melting Furnace System is a reliable, durable, and safe product with high power saving and low maintenance. It is an electric induction melting furnace that has excellent reliability and safety. The electric induction melting furnace is designed with advanced technology and has superior performance. It is a great choice for industrial applications and can provide efficient and cost-effective melting solutions.

The Induction Furnace System is an ideal solution for various industrial applications such as metal melting etc.. It is capable of melting metal material at a high efficiency while consuming less energy and producing low emission. The Induction Furnace System is also designed with a complete safety system to ensure the operators' safety and the cleaning working environment. It is easy to install and

operate, and it provides high durability and reliability with low maintenance.

## Support and Services:

### Induction Furnace System Technical Support and Service

We offer comprehensive technical support and service for our Induction Furnace System. Our team of experienced professionals are available to assist you with any questions or concerns you may have about the system.

Our technical support team is available 24 hours a day, 7 days a week to answer any questions or to provide troubleshooting assistance.

We also offer on-site installation and maintenance services.

We offer a range of service plans which can meet your needs. These service plans include regular system maintenance, system upgrades, and emergency repair services.

We are committed to providing the highest level of customer service and satisfaction. Please do not hesitate to contact us for any technical support or service needs.

## Packing and Shipping:

### Packaging and Shipping for Metal Melting Furnace System:

The induction furnace system should be packaged in a box filled with protective foam to minimize shipping damage. The box should be clearly labeled with the product's name, model number, serial number, and shipping address. All parts of the furnace system should be securely attached to the inside of the box to prevent movement during shipping. It is also important to include a packing slip with the box, listing the contents and the associated serial number.

The induction furnace system should be shipped via a reputable carrier. The box should be clearly marked with the appropriate shipping labels, and the delivery address should be clearly visible. Special care should also be taken to ensure the box is properly sealed to prevent tampering or damage during transportation.
