

Customizable Chamber Size Furnace Closed Cooling Tower for Industrial Manufacturing

Our Product Introduction

for more products please visit us on melt-furnaces.com

Basic Information

- Place of Origin: China
- Brand Name: Copper And Brass Heat Treatment Furnace
- Certification: ISO9001
- Model Number: SDHR001
- Minimum Order Quantity: 1 unit
- Price: According customers volume
- Packaging Details: water proof packing
- Delivery Time: 30-45 days
- Payment Terms: TT/LC
- Supply Ability: 1000 sets per month

Product Specification

- Features: High Efficiency, Energy Saving, Easy Operation
- Furnace Structure: Vertical Or Horizontal
- Atmosphere: Nitrogen Or Protective Gas
- Temperature Range: Up To 1250°C
- Heating Method: Induction Heating
- Power Supply: Customizable
- Material: Copper, Bronze And Brass
- Warranty: 1 Year
- Highlight: Industrial Manufacturing Closed Cooling Tower, Customizable Chamber Size Furnace

Product Description

Product Description:

The Copper And Brass Heat Treatment Furnace is a versatile and efficient solution designed for the heat treatment of copper and brass products. Constructed using high-quality materials such as copper, bronze, and brass, this furnace offers exceptional durability and performance.

Available in both vertical and horizontal configurations, the furnace structure can be customized to suit specific requirements, providing flexibility in installation and operation. Whether you need a vertical or horizontal setup, this furnace can accommodate your needs with ease.

One of the standout features of the Copper And Brass Heat Treatment Furnace is its high efficiency, which ensures optimal heat treatment processes while minimizing energy consumption. This not only results in cost savings but also contributes to a more sustainable operation. The furnace is designed to be energy-saving, making it an environmentally friendly choice for your heat treatment needs.

In addition to its efficiency and energy-saving capabilities, the furnace is also known for its easy operation. With user-friendly controls and intuitive interfaces, operators can easily monitor and adjust the heat treatment process to achieve the desired results. This simplifies the overall operation of the furnace, making it accessible to both experienced professionals and newcomers alike.

The primary application of this furnace is the heat treatment of copper and brass products. Whether you are looking to anneal, temper, or harden copper or brass components, this furnace provides the necessary conditions to achieve the desired metallurgical properties. From small parts to larger components, the furnace's chamber size is customizable to accommodate a wide range of product sizes and shapes.

Overall, the Copper And Brass Heat Treatment Furnace is a reliable and efficient solution for a variety of heat treatment applications. Its durable construction, customizable chamber size, high efficiency, energy-saving features, and easy operation make it a valuable asset for any industrial setting. Whether you are operating a bronze melting furnace, bronze melting furnace, or require precise copper heat treatment, this furnace is designed to meet your needs and exceed your expectations.

Features:

Product Name: Copper And Brass Heat Treatment Furnace

Heating Zone: Single Or Multiple

Heating Method: Induction Heating

Furnace Structure: Vertical Or Horizontal

Warranty: 1 Year

Atmosphere: Nitrogen Or Protective Gas

Technical Parameters:

Temperature Range:	Up To 1250°C
Control System:	PLC Control System
Furnace Structure:	Vertical Or Horizontal
Features:	High Efficiency, Energy Saving, Easy Operation
Power Supply:	Customizable
Heating Zone:	Single Or Multiple
Application:	Heat Treatment Of Copper And Brass Products
Material:	Copper, Bronze And Brass
Type:	Heat Treatment Furnace
Cooling Method:	Closed Cooling Tower

Applications:

The Copper And Brass Heat Treatment Furnace, model number SDHR001, is a versatile and reliable heat treatment solution suitable for a variety of applications in different industries. Its brand name, originating from China, is synonymous with quality and efficiency. With ISO9001 certification, this furnace guarantees high standards in performance and durability.

Whether you are looking to melt bronze, brass, or copper, this furnace is the perfect choice for your heat treatment needs. Its heating method using induction heating ensures fast and uniform heating, making it ideal for melting and processing these metals.

The cooling method of this furnace utilizes a closed cooling tower system, which helps maintain optimal operating temperatures and prolongs the lifespan of the equipment. The PLC control system provides precise and easy-to-use controls for efficient operation.

With a minimum order quantity of just 1 unit and flexible pricing based on customer volume, this furnace is accessible to both small-scale operations and large industrial facilities. The water-proof packaging ensures safe transportation and delivery of the product.

Due to its high supply ability of 1000 sets per month, customers can rely on the availability of this furnace for their production needs. The delivery time of 30-45 days and payment terms of TT/LC offer convenience and flexibility for customers.

Overall, the Copper And Brass Heat Treatment Furnace is a top choice for industries requiring a reliable and efficient solution for melting and heat treatment processes. Its robust construction, advanced features, and quality materials make it a valuable asset for businesses across various sectors.

Customization:

Product Customization Services for the Copper And Brass Heat Treatment Furnace:
Brand Name: Copper And Brass Heat Treatment Furnace
Model Number: SDHR001
Place of Origin: China
Certification: ISO9001
Minimum Order Quantity: 1 unit
Price: According customers volume
Packaging Details: water proof packing
Delivery Time: 30-45 days
Payment Terms: TT/LC
Supply Ability: 1000 sets per month
Material: Copper, Bronze And Brass
Power Supply: Customizable
Control System: PLC Control System
Chamber Size: Customizable
Heating Zone: Single Or Multiple
Keywords: brass melting furnace, bronze melting furnace, copper melting furnace

Support and Services:

The Copper And Brass Heat Treatment Furnace product comes with comprehensive technical support and services to assist customers with any issues they may encounter. Our team of experts is available to provide guidance on installation, operation, and maintenance of the furnace.
In addition, we offer training sessions to ensure that users are well-versed in operating the furnace efficiently and safely. Our technical support team is dedicated to resolving any product-related issues promptly to minimize downtime and maximize productivity.
Furthermore, we provide regular maintenance services to keep the furnace in optimal working condition, ensuring long-term reliability and performance. Our goal is to deliver unparalleled support to our customers and ensure their satisfaction with our Copper And Brass Heat Treatment Furnace product.

Packing and Shipping:

Product Packaging:
The Copper And Brass Heat Treatment Furnace is carefully packaged to ensure safe transportation and delivery. Each component is securely wrapped and placed in a sturdy cardboard box with ample padding to prevent any damage during transit. The package is labeled with handling instructions and product details for easy identification.
Shipping:
Once your order is confirmed, the Copper And Brass Heat Treatment Furnace will be shipped within 1-3 business days. We partner with reliable shipping carriers to ensure timely delivery to your specified address. You will receive a tracking number to monitor the status of your shipment. Please ensure someone is available to receive and inspect the package upon delivery.
