

Copper Brass Heat Treatment Furnace 1250°C Customizable Chamber

Our Product Introduction

for more products please visit us on melt-furnaces.com

Basic Information

- Place of Origin: China
- Brand Name: Copper And Brass Heat Treatment Furnace
- Certification: ISO9001
- Model Number: SDHR001
- Minimum Order Quantity: 1 unit
- Price: According customers volume
- Packaging Details: water proof packing
- Delivery Time: 30-45 days
- Payment Terms: TT/LC
- Supply Ability: 1000 sets per month

Product Specification

- Features: High Efficiency, Energy Saving, Easy Operation
- Heating Method: Induction Heating
- Temperature Range: Up To 1250°C
- Application: Heat Treatment Of Copper And Brass Products
- Furnace Structure: Vertical Or Horizontal
- Heating Zone: Single Or Multiple
- Control System: PLC Control System
- Atmosphere: Nitrogen Or Protective Gas
- Highlight: copper brass heat treatment furnace, customizable chamber heat furnace, 1250°C brass annealing furnace

Product Description

Product Description:

The Copper And Brass Heat Treatment Furnace is a high-quality industrial furnace designed specifically for copper and brass heat treatment processes. With customizable power supply options, this furnace offers versatility and efficiency in achieving precise temperature control for heat treatment applications.

Operating at temperatures up to 1250°C, this heat treatment furnace ensures the accurate and uniform heating of copper and brass materials, making it ideal for various heat treatment processes such as annealing, quenching, and tempering.

The chamber size of the Copper And Brass Heat Treatment Furnace is also customizable to suit the specific needs of your operations.

Whether you require a compact furnace for small-scale production or a larger chamber for batch processing, this furnace can be tailored to meet your requirements effectively.

As a dedicated heat treatment furnace, this equipment is optimized for the efficient treatment of copper and brass materials, offering precise temperature control and uniform heating throughout the chamber. The furnace is designed to deliver reliable and consistent results, ensuring the quality and integrity of your copper and brass components.

With a focus on performance and durability, the Copper And Brass Heat Treatment Furnace is built to withstand the demanding conditions of heat treatment processes. Its robust construction and advanced heating elements enable it to maintain the desired temperature range with accuracy, ensuring optimal results for your copper and brass heat treatment applications.

As a specialized heat treatment furnace, this equipment is backed by a 1-year warranty, providing you with confidence and peace of mind in its performance and reliability. The warranty reflects the manufacturer's commitment to quality and customer satisfaction, ensuring that your investment is protected and supported.

In summary, the Copper And Brass Heat Treatment Furnace is a versatile and efficient solution for copper heat treatment processes, offering customizable power supply options, a temperature range of up to 1250°C, and a customizable chamber size. With its dedicated design for copper and brass materials, this furnace delivers reliable and consistent results, making it a valuable asset for various heat treatment applications.

Features:

Product Name: Copper And Brass Heat Treatment Furnace

Application: Heat Treatment Of Copper And Brass Products

Temperature Range: Up To 1250°C

Heating Zone: Single Or Multiple

Control System: PLC Control System

Warranty: 1 Year

Technical Parameters:

Furnace Structure	Vertical Or Horizontal
Features	High Efficiency, Energy Saving, Easy Operation
Application	Heat Treatment Of Copper And Brass Products
Type	Heat Treatment Furnace
Warranty	1 Year
Material	Copper, Bronze And Brass
Heating Method	Induction Heating
Heating Zone	Single Or Multiple
Temperature Range	Up To 1250°C
Power Supply	Customizable

Applications:

The **Copper And Brass Heat Treatment Furnace** (Model: SDHR001) is a top-of-the-line industrial equipment originating from China, renowned for its exceptional quality and performance. With **ISO9001** certification, customers can trust in its reliability and effectiveness. The minimum order quantity is just 1 unit, and the price varies according to the volume ordered.

Designed for heat treatment applications, this furnace is ideal for scenarios where precise temperature control is essential. Its versatility allows for a wide range of uses, including copper heat treatment and bronze melting. The furnace's vertical or horizontal structure offers flexibility in various operational setups.

The **Copper And Brass Heat Treatment Furnace** boasts features such as high efficiency, energy-saving capabilities, and easy operation. Its temperature range reaches up to 1250°C, making it suitable for a multitude of heat treatment processes.

Whether for industrial manufacturing plants or research facilities, this furnace is a valuable asset for applications requiring controlled heating. The water-proof packaging ensures safe delivery, with a turnaround time of 30-45 days. Customers can choose from payment terms such as TT or LC, and the supply ability of 1000 sets per month guarantees prompt availability.

Customizable power supply options further enhance the adaptability of this furnace to meet specific operational requirements. The **Copper And Brass Heat Treatment Furnace** excels in providing consistent and precise heating for a variety of metals, making it indispensable in modern industrial settings.

Customization:

Product Customization Services for the Copper And Brass Heat Treatment Furnace:

Brand Name: Copper And Brass Heat Treatment Furnace

Model Number: SDHR001

Place of Origin: China

Certification: ISO9001

Minimum Order Quantity: 1 unit

Price: According customers volume

Packaging Details: water proof packing

Delivery Time: 30-45 days

Payment Terms: TT/LC

Supply Ability: 1000 sets per month

Cooling Method: Closed Cooling Tower

Features: High Efficiency, Energy Saving, Easy Operation

Heating Method: Induction Heating

Application: Heat Treatment Of Copper And Brass Products

Power Supply: Customizable

Support and Services:

The Copper And Brass Heat Treatment Furnace product comes with comprehensive technical support and services to ensure optimal performance and efficiency. Our team of experts is available to provide assistance with installation, setup, and ongoing maintenance of the furnace. In addition, we offer training programs to help operators maximize the potential of the equipment.

Our technical support also includes troubleshooting assistance to address any issues that may arise during operation. We are committed to ensuring that our customers have a seamless experience with our product and are available to provide guidance and solutions whenever needed.

Furthermore, we offer various service packages to meet the specific needs of our customers, including regular maintenance checks, upgrades, and repairs. Our goal is to support our customers throughout the lifespan of the product and ensure long-term satisfaction with its performance.
