

Medium Frequency Melting Furnace with ISO9001 Safety System

Our Product Introduction

for more products please visit us on melt-furnaces.com

Basic Information

- Place of Origin: China
- Brand Name: Hua Rui
- Certification: patent certificates; national testing report ; BPQC quality management system
- Model Number: customized
- Minimum Order Quantity: 1 set
- Price: Negotiation
- Packaging Details: waterproof packing
- Delivery Time: 30~45 days
- Payment Terms: T/T, L/C
- Supply Ability: 1000 sets/ year

Product Specification

- Feature: High Energy Saving ; Smooth Operation; Low Noise
- Quality: Prime
- Temperature Control: Precise
- Safety System: ISO9001
- Durability: Long
- Name: Medium Frequency Melting Furnace
- Power Supply: AC
- Maintenance: Low
- Highlight: **Medium Frequency Melting Furnace with ISO9001**
, ISO9001 certified melting furnace,
safety system melting furnace

Product Description

Product Description:

The Medium Frequency Melting Furnace is a top-of-the-line steel melting furnace designed for industrial applications. With its efficient induction smelting technology, this furnace is capable of melting steel and other metals with ease and precision. One of the outstanding features of the Medium Frequency Melting Furnace is its high energy-saving capabilities. By utilizing advanced technology, this furnace ensures optimal energy efficiency, helping to reduce operational costs and environmental impact. Furthermore, this furnace is known for its smooth operation, providing a seamless melting process that enhances productivity and efficiency in metalworking operations. The low noise output of the furnace also contributes to a more comfortable working environment for operators. Equipped with precise temperature control mechanisms, the Medium Frequency Melting Furnace offers consistent and accurate melting temperatures, ensuring the quality and integrity of the melted metal. This level of control is essential for achieving desired metallurgical properties and meeting strict quality standards. In terms of maintenance, the Medium Frequency Melting Furnace boasts low maintenance requirements, reducing downtime and maintenance costs for industrial facilities. This feature contributes to the overall cost-effectiveness and longevity of the furnace. When it comes to quality, the Medium Frequency Melting Furnace is at the top of its class. Built with prime materials and superior craftsmanship, this furnace is designed to withstand the rigors of continuous operation and deliver reliable performance over time. Whether you are looking to melt steel, alloys, or other metals, the Medium Frequency Melting Furnace is a versatile and efficient solution for industrial melting applications. Its combination of high energy-saving features, smooth operation, precise temperature control, low maintenance requirements, and prime quality construction make it an ideal choice for metalworking operations that require a reliable and high-performance steel melting furnace.

Features:

Product Name: Medium Frequency Melting Furnace
Quality: Prime
Maintenance: Low
Temperature Control: Precise
Power Supply: AC
Durability: Long

Technical Parameters:

Quality	Prime
Maintenance	Low
Safety System	ISO9001
Feature	High Energy Saving; Smooth Operation; Low Noise
Durability	Long
Temperature Control	Precise
Name	Medium Frequency Melting Furnace
Power Supply	AC

Applications:

Hua Rui's Medium Frequency Melting Furnace is a cutting-edge product designed for various smelting applications. With its advanced electric induction melting system, this furnace offers unparalleled performance and efficiency in melting and casting processes. Manufactured in China, this Medium Frequency Melting Furnace comes with a range of certifications including patent certificates, national testing reports, and compliance with the BPQC quality management system. This ensures the highest quality standards and reliability for your smelting operations. Whether you are in the metal casting industry or involved in material research, this induction melting furnace is customizable to meet your specific requirements. The minimum order quantity is just 1 set, and pricing is negotiable based on your needs. For packaging, the furnace is securely packed in waterproof materials to ensure safe delivery. The delivery time is estimated to be between 30 to 45 days, with payment terms accepted via T/T or L/C. With a supply ability of 1000 sets per year, you can rely on the Medium Frequency Melting Furnace to meet your production demands. Operating on AC power supply, this furnace boasts low maintenance requirements, making it cost-effective and efficient for your operations. Equipped with a safety system compliant with ISO9001 standards, you can trust in the prime quality and safety of this furnace for your

smelting processes. Whether you need to melt metals for casting or conduct material analysis, the Medium Frequency Melting Furnace from Hua Rui is the ideal solution for your industrial needs.

Customization:

Product Customization Services for the Medium Frequency Melting Furnace:

Brand Name: Hua Rui

Model Number: customized

Place of Origin: China

Certification: patent certificates; national testing report; BPQC quality management system

Minimum Order Quantity: 1 set

Price: Negotiation

Packaging Details: waterproof packing

Delivery Time: 30~45 days

Payment Terms: T/T, L/C

Supply Ability: 1000 sets/year

Durability: Long

Safety System: ISO9001

Power Supply: AC

Feature: High Energy Saving; Smooth Operation; Low Noise

Quality: Prime

Keywords: electric induction smelting furnace, aluminum melting furnace, electric induction smelting furnace
