

Medium Frequency Melting Furnace with ISO9001 Safety and Low Noise

Basic Information

Place of Origin: ChinaBrand Name: Hua Rui

• Certification: patent certificates; national testing report;

BPQC quality management system

Model Number: HR0010Minimum Order 1 set

Quantity:

• Price: Negotiation

Packaging Details: waterproof packing

Delivery Time: 30~45 days
 Payment Terms: T/T, L/C

• Supply Ability: 1000 sets/ year

Product Specification

Safety System: ISO9001
Temperature Control: Precise
Quality: Prime
Power Supply: AC

Name: Medium Frequency Melting Furnace

Durability: LongMaintenance: Low

• Feature: High Energy Saving ; Smooth Operation;

Low Noise

Highlight: Medium Frequency Melting Furnace with

1509001

, Low Noise Melting Furnace, ISO9001 Certified Melting Furnace

Product Description:

One of the standout features of this steel melting furnace is its high energy-saving capabilities. With efficient power consumption, this furnace helps reduce operational costs while maintaining optimal performance. The advanced technology used in this furnace ensures that it delivers consistent and reliable results with every use.

In addition to its energy-saving benefits, the Medium Frequency Melting Furnace is praised for its smooth operation. The furnace is engineered to perform seamlessly, providing a hassle-free melting process that enhances productivity. Its user-friendly interface and controls make it easy to operate, even for those new to steel melting furnace operations.

Furthermore, the Medium Frequency Melting Furnace is designed with low noise levels in mind. This feature not only creates a more comfortable working environment but also reduces noise pollution in industrial settings. The quiet operation of this furnace allows for a more focused and efficient melting process without distractions.

When it comes to safety, the Medium Frequency Melting Furnace is equipped with an ISO9001-certified safety system. This certification ensures that the furnace meets international safety standards, providing operators with peace of mind during use. The safety system is designed to prevent accidents and hazards, making the furnace a reliable and secure option for steel melting applications.

Overall, the Medium Frequency Melting Furnace is a top choice for industrial settings requiring a high-quality, durable, and efficient steel melting furnace. Its energy-saving features, smooth operation, low noise levels, and ISO9001 safety system make it a standout product in the market. Invest in the Medium Frequency Melting Furnace for reliable performance and exceptional results in your steel melting operations.

Features:

Product Name: Medium-Frequency-Melting Furnace - -

Temperature Control: Precise

Maintenance: Low

Name: Medium Frequency Melting Furnace

Feature: High Energy Saving Feature: Smooth Operation Feature: Low Noise Safety System: ISO9001

Technical Parameters:

Maintenance	Low
Safety System	ISO9001
Power Supply	AC
Durability	Long
Quality	Prime
Feature	High Energy Saving; Smooth Operation; Low Noise
Name	Medium Frequency Melting Furnace
Temperature Control	Precise

Applications:

Hua Rui's Medium Frequency Melting Furnace, model HR0010, is a top-of-the-line product originating from China. This product boasts a range of certifications including patent certificates, a national testing report, and adherence to the BPQC quality management system. With a minimum order quantity of just 1 set, pricing is open for negotiation.

The Medium Frequency Melting Furnace is designed for a variety of application occasions and scenarios, making it a versatile choice for industries requiring an induction melting furnace, electric induction melting system, or electric induction smelting furnace. Its precise temperature control ensures optimal results, while the low maintenance requirements keep operations running smoothly.

One of the standout features of this furnace is its high energy-saving capabilities, making it an environmentally friendly option without compromising on performance. The smooth operation and low noise level further enhance its appeal in various industrial settings. When it comes to packaging, rest assured that the Medium Frequency Melting Furnace will arrive in waterproof packing, ensuring its safe delivery. The lead time for delivery ranges from 30 to 45 days, with payment terms available via T/T or L/C. The supply ability of this product is set at 1000 sets per year, meeting the demands of various production scales.

In terms of quality, the Medium Frequency Melting Furnace is classified as prime, guaranteeing reliable and efficient performance. Whether you are looking to melt metals for casting or other industrial applications, this furnace is a dependable choice that combines quality with efficiency.

Customization:

Product Customization Services for the Medium Frequency Melting Furnace:

Brand Name: Hua Rui

Model Number: HR0010 Place of Origin: China

Certification: patent certificates; national testing report; BPQC quality management system

Minimum Order Quantity: 1 set

Price: Negotiation

Packaging Details: waterproof packing

Delivery Time: 30~45 days Payment Terms: T/T, L/C Supply Ability: 1000 sets/year

Quality: Prime Power Supply: AC Safety System: ISO9001

Feature: High Energy Saving; Smooth Operation; Low Noise

Temperature Control: Precise

Support and Services:

The Medium Frequency Melting Furnace product comes with comprehensive product technical support and services to ensure optimal performance and reliability. Our team of technical experts is available to provide assistance with installation, troubleshooting, and maintenance of the furnace.

Additionally, we offer training programs to help users operate the furnace efficiently and safely. Our service team is dedicated to delivering timely support and addressing any issues that may arise during the usage of the product.

For any technical inquiries or service requests, please do not hesitate to reach out to our support team.
